This month sow Hemp and Flax, pole Hops, set and sow all kinds of Garden Herbs. Restore the liberty of the laborious Bee by opening her Hive. Bark Trees for Tanners; and let good Housewives mind their Gardens, and begin to think of their Dairies.

*In Gard'ning never this Rule for-  
To sow dry, and set wet. (get,*

The use of Physick becomes now seasonable, as also Purging and Blood letting. It is good to abstain from Wine, for many diseases will be taken thereby to the ruine of many.

This month the Pores of the Body are open, and apt to receive Physick; therefore this is the best time to remove and prevent causes of sickness, or for speedy remedy in extremity pray to God for a blessing.

This month commands the pro-  
 vident Housewife, and the pru-  
 dent Artill, to s t their Stills on  
 work. In the beginning of the  
 Month sow and set those tender  
 Summer Herbs that would not  
 endure the former cold. Weed  
 your Hop Gardens, cut off su-  
 perfluous Branches. Mow Trees  
 and Gardens, and weed Corn-  
 rise early and walk the Fields and  
 Gardens.

Now every Garden and Hedge  
 affords thee Food and Physick.  
 Rise early, walk the Fields by  
 running streams, the North and  
 West sides. Sage and Sweet But-  
 ter, an excellent break-fast.  
 Chrified Whay with Sage. Sour-  
 vey-Grass Ale, and Worm-wood  
 Beer, are wholesome Drinks. Green  
 Whay excellent against Choler.  
 Eat and drink betimes in the  
 morning. Abstain from Meats  
 that are hot in Nature, and salt  
 in Qualiry.

At the Full of the Moon this month and next, gather your herbes to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish three or four days after the Full, and they will not run to seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs, or Flowers with knife, but rather gather them with your fingers.

Let honest moderate Labour and Exercise procure your Sweat. Use thin and light Diet, and chaste thoughts tend to health. Lie not unadvisely on the ground, or over hastily drink.

Distilling of Roses, and making of Syrrups and Conserve are now in prime: Use a light and thin Diet, for the Stomach is weaker now than in the former months: Clarified Whay boiled with cold Herbs, are very wholsom.

Get Rue, Wormwood, and Gall, to strew on your Floors, to destroy Fleas. At the Full Moon gather Flowers and seeds, dry your Flowers rather in the shade, than in the Sun, which too much exhalet their vertue; but to avoid corruption, let the Suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilential diseases: Forbear superfluous drinking, but eat heartily; use cold herbs and meats, abstain from Physick. Now the Rivers are more wholesome than the Baths. In time of Pestilence keep your Chamber windows shut till the Sun have force of shining. Perfume your Chamber every morning with Tar, upon a Chafing-dish of Coals: Use *Cardus Benedictus* boiled, and drink fasting.

The beginning of this month, and the end of the former gather Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees. make Verjuice, remove and set all slips of Flowers between the two Lady-days; remove Trees from September till February, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, sow Wheat and Rye, Winter Parsnips and Carrots; and set Roses, Strawberries, and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosely, to prevent that you might after repent of. Good for Physick and Phlebotomy.

## A Description of the four Quarters of the Year.

**T**He Spring-Quarter begins this year March 9, 32 m. after 2 Afternoon; at which time the Sun enters the Equinoctial Sign Aries, causing an equality of day & night all over the habitable World. Summer takes beginning June 10, 4 m. past 5 Afternoon; the Sun then enters the Tropical Sign Cancer, making with us the longest days & the shortest nights, having then his greatest Declination North, also his greatest Meridian Altitude and Amplitude. Autumn, or Harvest-Quarter, begins Sept. 12, 25 m. past 8 in Morning, again equalizing both days and nights, and touches the first part of the Equinoctial Sign Libra. Winter begins Decemb. 10, 27 m. past 8 at night; the Sun then touches the first Scruple of the Tropical Sign Capricorn, making the shortest days and longest nights in the year, on the North-side of the Equator, and the contrary to those Inhabitants (if any be) on the Southern side thereof; and the place of the Sun may be had near enough for common use by adding a degree for every day from the beginning of each month, which take as followeth: Jan. Capr. 21. Feb. Aquar. 22. Mar. Pis. 20. April Aries 21. May Taur. 20. June Gem. 19. July Canc. 18. Aug. Leo 18. Sept. Virg. 18. Octob. Lib. 17. Novemb. Scorp. 18. Decemb. Sagit. 19. Note, That if the Number of Degrees exceeds 30, the Excess must be accounted in the next Sign: This needs no farther Illustration.

## Of the Eclipses happening this Year.

There will be five Eclipses this year, three of the Sun, and two of the Moon: The first is of the Sun, Jan. 6. about half an hour past 5 at night, but invisible to us. The second is a small Eclipse of the Moon, June 17. about 36 m. past 2 in morning, and will be visible to us if the Air be clear. The third is an Eclipse of the Sun, July 2. 38 m. past 2 in Afternoon, the beginning about 2 P.M. and the end about a quarter after 4, Digits eclipsed near 8. The fourth Eclipse is of the Moon, Decemb. 11. about 50 m. past 10 at night, Total Duration 3 hours and a quarter. The fifth Eclipse is of the Sun, Decemb. 26. about 3 quarters past 2 in morning, invisible in our Horizon.
